-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 08 March 2004.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

### DETAILED ACTION

1. The supplemental declaration under 37 CFR 1.132 filed March 8, 2004, is sufficient to overcome the rejection of claims 1-20 and 24-32 based upon the SD Memory Card Specification version 1.0 in the 35 USC §102(a) rejection set forth in the previous Office Action.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Heath et al., U.S. Pat. No. 5,491,804 (previously cited by applicant).

As per claim 1, Heath shows a method in a system including a host (fig.1, e.g. CPU 8) and a plurality of sockets (2) in which electronic cards (5) are inserted and connected, the method comprising transferring data between the host and card addressed over a command circuit connected between the host and the plurality of sockets, the data being transferred through a data circuit also connected between the host and the sockets; and normally transferring commands that control operation of the electronic circuit cards from the host to an individual card over the command circuit connected between the host and the sockets except when unique addresses of the individual cards are being defined by communication between the host and the cards one at a time over the command circuit that is alternatively connected to one of the plurality of sockets at a time (at least in cols. 3-4, wherein the slots are individually accessed by slot address in order to connect with the individual cards for the setting of the card

Art Unit: 2111

addresses/IDs during system start up and the card addresses are then used during normal operations to access the individual cards). Heath shows all of the steps recited in claim 1.

As for claim 4, the argument for claim 1 applies. Heath also shows that the electronic circuit cards include re-writeable non-volatile memory in which the transferred data are stored (at least in col.2, lines 26-28). Heath shows all of the steps recited in claim 4.

#### ***Allowable Subject Matter***

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The reasons for allowance for claims 2,5,14, and 16 set forth in paper no. 9, the Office Action mailed on April 8, 2003, also apply to claims 24 and 27. Now that the SD Memory Card specification reference has been overcome by applicant's supplemental declaration in combination with the declaration filed October 9, 2003, the reasons for allowance in paper no. 9 once again apply to the claims.

With regard to claims 10 and 13, the prior art does not appear to show the specific limitations regarding the use of only one contact on the card receiving commands in combination with the limitations of paragraph (C) in claim 10 and the limitation that the command line is selectively connectable to any one or all of the individual cards in claim 13.
